

**LOVCEN**  
**THIRD TRAINING PLAN (THIRD RESEARCH YEAR June 2016 – May 2017)**

No.	Training / Study visit	Participants		When		Where (State/City)	Estimated cost ( Euro )	Description	Comments (preparation /in progress /finished...)	Realized	
		Category of participants	No. of Participants	Date	No. of days					Yes	No
3.1	In situ training to: BTF for: Finalization of sociological research (WP1d, WP2c)	Cosmin Salasan USAMVBT, key researcher and responsible person for partner organization	1	22-26 June 2016	duration 5 Total 5	Podgorica, Montenegro	1205	This activity is planned to end the sociological survey, collect data from Municipalities and Touristic operators, finish data analyses and collect as well as prepare data for creation Policy recommendations.			
3.2	In situ training to: BTF for: Training for usage of KOMARAC APP and interactive map of Montenegro for visualization of determinate mosquito species (WP1b, WP2c)	Ilija Arsenic FoA, researcher from partner organization	1	18-22 June 2016	duration 5 Total 5	Podgorica, Montenegro	875	This activity is planned as training for KOMARAC APP and Interactive map of Montenegro usage.			
3.3	In situ training to: BTF for: On field training in implementation of mosquito surveillance and non-chemical control measures in Montenegro. (WP1a, WP1e, WP2c)	Romeo Bellini CAA, key researcher, WP1 leader, responsible person for partner organization  Dusan Petric FoA, key researcher, WP2 leader, responsible person for partner organization	2	August 2016	duration 5 Total 10	Podgorica, Montenegro	2225	Continuation of trainings from first two research years - This activity is planned to support collaborative research on surveillance of MV/MBD and non-chemical control measures in Montenegro. Apart from direct involvement in research activities (WP1a and WP1e), international partners will provide practical training to MCM - implementation of mosquito surveillance and <i>in situ</i> field training.	The exact date will be fixed latter		
3.4	Training / Study visit to: CAA for: Training in implementation of mosquito surveillance measures. (WP2b)	Snezana Dragicevic, NHM, key researcher for partner organization	1	September 2016	duration 5 Total 5	Bologna, Italy	1425	This activity is planned to support collaborative research on surveillance of MV surveillance measures. Researchers from international partner organization will provide practical training to MCM - implementation of mosquito <i>in situ</i> field surveillance in region affected by Chikungunya outbreak in 2014.	The exact date will be fixed latter		
3.5	Training / Study visit to: FoA for: mosquito identification. (WP2a)	Igor Pajovic BTF, project leader, WP4 leader  Ljiljana Pajovic BTF, WP3 leader, researcher	2	September – October 2016	duration 14 Total 28	Serbia, Novi Sad	3680	Continuation of trainings from first two research years - The aim of this training is mosquito identification (WP1a), most recent advances in invasive mosquito surveillance and mosquito vector sampling for virus identification. This trainings lead MCM-s to implementation of the ECDC “Guidelines for the surveillance of invasive mosquitoes in Europe” and introducing the sustainable programme for monitoring of indigenous MV species.	The exact date will be fixed latter		

3.6	Know-how visits of MCM's researchers to research partnering organization to: IZSLER for: Training in the techniques of molecular detection of mosquito borne viruses. (WP2b)	IPH, researcher IPH, researcher	2	September, October, November, December 2016	duration 5 Total 10	Brescia, Reggio Emilia, Italy	2850	Training visits of MCM's researchers to international partner institutions. During the visit researcher will be in a position to see clinical cases of patients affected with Dengue, Chikungunya and Zika virus, and to make stronger connection (possibly to sign a contract) with partner institution from EU.	The exact date and name of the researchers will be fixed latter		
3.7	Know-how visits of MCM's researchers to research partnering organization - NIV for: Training in the techniques of molecular detection of mosquito borne viruses. (WP2b)	IPH researcher	1	September, October, November, December 2016	duration 5 Total 5	Novi Sad, Serbia	750	Continuation of trainings from first research year - Know-how visits of MCM's researchers to research partnering organization. During the visit researcher will be trained in the techniques of molecular detection of mosquito borne viruses and preparation of "in house" tests as well as veterinary surveillance of MBV. After the course, researchers will be able to fully exploit the capabilities of PCR.	The exact date and name of the researcher will be fixed latter		
3.8	Training / Study visit to: IZSLER for: Training in the techniques of molecular detection of mosquito borne viruses in the Emilia Romagna Region. (WP2b)	IPH researcher	1	September, October, November, December 2016	duration 5 Total 5	Reggio Emilia, Italy	1425	During the visit researcher will be trained in the techniques of molecular detection of mosquito borne viruses, and will be in a position to see clinical cases of patients affected with Dengue, Chikungunya and Zika virus.	The exact date and name of the researcher will be fixed latter		
3.9	In situ training to: BTF for: On field research activities, practical training (implementation of mosquito surveillance...) and non-chemical control measures in Montenegro. (WP2c)	Marija Zgomba FoA, researcher from partner organization	1	October, November, December 2016 January, February 2017	duration 5 Total 5	Podgorica, Montenegro	875	Continuation of trainings from first two research years - This activity is planned to support collaborative research on non-pesticide control measures in Montenegro. Apart from direct involvement in research activities (WP1e), international partners will provide specific practical training - implementation of mosquito control.	The exact date will be fixed latter		
3.10	In situ training to: IPH for: Planning the research activities in MBD survey in Montenegro. (WPc)	Tamas Petrovic NIV, key researcher, responsible person for partner organization	1	October, November, December 2016 January, February 2017	duration 5 Total 5	Podgorica, Montenegro	875	Continuation of trainings from first two research years - This activity is planned to support collaborative research on surveillance of MBD in Montenegro in mosquitoes (WP1c). International partner will come to Montenegro to help in planning the research activities and to provide specific laboratory / practical training to MCM in MBD surveillance.	The exact date will be fixed latter		
3.11	In situ training to: IPH for: Planning the research activities in MBD survey in Montenegro. (WP2c)	Michele Dottori IZSLER, key researcher, responsible person for partner organization	1	November, December 2016	duration 5 Total 5	Podgorica, Montenegro	1350	Continuation of trainings from first two research years - This activity is planned to support collaborative research on surveillance of MBD in Montenegro in human sera. International partner will come to Montenegro to help in planning the research activities and to provide specific laboratory / practical training to MCM in MBD surveillance. (WP1c)	The exact date will be fixed latter		
3.12	Work shop to: IPH for: Training in research skills and innovation capacity building. (WP 3a)	Stephen Quarrie BTF, key researcher, associate Professor of BTF	1	January 2017	duration 5 Total 5	Podgorica, Montenegro	875	Continuation of trainings from first two research years - Workshop to MCM staff in innovative research, presentation skills, manuscript and project writing, time and human resources management, research supervision in order to bring research, personnel and resources in line with education and research strategy and maximize efficiency of the research process.	The exact date will be fixed latter		

3.13	In situ training to: IPH for: Planning the research activities in MBD survey in Montenegro. (WP2c)	Vesna Milosevic, FoM, key researcher, responsible person for partner organization Ivana Hrnjakovic Cvjetkovic, FoM, researcher	2	November, December 2016	duration 5 Total 10	Podgorica, Montenegro	1750	This activity is planned to support collaborative research on surveillance of MBD in Montenegro (WP1c). International partners will come to Montenegro to help in planning the research activities and to provide specific laboratory / practical training to MCM in MBD surveillance. As well as to transfer their experiences in the field of prevention of infectious diseases associated with mass gatherings.	This activity is transferred from the second year Training plan – it was not conducted during the second research year due to the technical problems. The exact date will be fixed latter		
3.14	Training / Study visit to: USAMVBT for: finalization of sociological research analyzes and creation of Policy recommendations. (WP2b)	Igor Pajovic, BTF, key researcher for partner organization, project leader, WP4 leader and Ljiljana Pajovic BTF, WP3 leader, researcher	2	November, December 2016	duration 5 Total 10	Timisoara, Romania	2560	This activity is planned for creation of Policy recommendations.  One of the most important goals and achievements of the Project will be Policy recommendations. They will be direct result of scientific research on the field and important guidelines for further resolutions of decision makers.	The exact date will be fixed latter		
3.15	Participation of the applicant's research staff at international conferences	LOVCEN researcher	1	during the 3 <sup>rd</sup> research year	duration 5 Total 5	/	1610	Participation of the applicant's research staff at international conferences. Goals are presentation of LOVCEN Project results, increasing visibility to EU researchers, knowledge sharing and network building.	The exact date, name of the researcher and place of conference will be fixed latter		
3.16	Final meeting BTF for: official overview of the LOVCEN Project (WP 4)	Romeo Bellini Dusan Petric Cosmin Salasan Michele Dottori Paolo Bonilauri Tamas Petrovic Steve Quarrie	7	February, March 2017	duration 5 Total 35	Podgorica, Montenegro	7880	Gathering all Project partners, PMT and LMT. Presentation of LOVCEN Project results. - overall project management, - budget management, - reports to the HERIC, - overview in progress reports, - coordination and cooperation on the project, - overview to the project results, - identifying Horizon 2020 opportunities, - overview on business partner and users links.			
		<i>Total</i>	<i>26</i>		<i>Dura- tion: 84; Total: 148</i>		<i>30.930</i>				

The activities No. 3.3, 3.5, 3.7, 3.9, 3.10, 3.11, 3.12 are continuation of the activities/trainings/mobility's from the first and second research years according to the Project Plan and Project Budget. In Project proposal, as well as in proposed/accepted Budget plan, is planned that activities/trainings will be spread throughout the years of Project life-time. On that way the activities are subdivided into parts, one part for every year needs to be accomplished. On this way at the end of the Project proclaimed goal of, each, mobility will be reached.
