MediLabSecure in Montenegro / Selection of your laboratory (3)

MLS ENTOMO

Oct 7 at 5:21 PM

Dear Igor Pajovic,

A selection committee composed of experts in animal health, human health and medical entomology took place on October 3rd at Institut Pasteur, Paris.

We are glad to inform you that **your laboratory has been selected as a member of the network of medical entomology laboratories** (working group 4) within MediLabSecure.

Selection criteria have been focused on the status of the laboratory as reference, capacities related to arboviruses, diagnostic performance, laboratory equipment and capacities, and visibility in the scientific community. We have received 31 responses to the medical entomology questionnaire from 18 countries.

We will come back to you very soon to give you the official list of the directory and more details on the next steps of the project.

Please be kind to confirm your interest and your participation in this network.

We thank you very much for your collaboration during this process, for your availability, and for your input.

Please visit the MediLabSecure website : www.medilabsecure.com

Best regards,

--
